

To all EXUS members,

Last month we made an agreement with the EXUS team, in exchange for several nodes, we will be providing support to the EXUS coin in the open market.

We would like to briefly outline the strategy and our approach regarding EXUS.

First and foremost, we want to make it clear that we respect the decentralization of EXUS. Our strategy consists of a few elements. We will support and defend the price against excessive selling. We will also provide liquidity so that whoever wants to sell can sell in an orderly manner. Lastly, we will be buying in the open market and we will utilize a percentage of the fund's profits to buy.

At any given time, we will not exceed 10% of ownership of the EXUS network and its masternodes. Our focus is to increase distribution by increasing the number of nodes and to increase the number of node holders.

Our objective is to create awareness and advance EXUS to increase acceptability of the coin on a global scale.

We are excited about this partnership with the coin and its team and we are looking forward to be working with them in the long term.

Thank You,  
Crypto-Fund
